

## **Regulatory Compliance Solutions**

Providing quick response services is essential when a client is dealing with unauthorized removal of asbestos-containing material (ACM). The removal of the material was performed by unauthorized personnel without knowledge of the consequences and without knowledge of administrative personnel. Having been called by the facility, ESI provided the following services:

- Licensed Inspector on-site immediately
- Secured the area
- Clean-up plan designed and communicated to client
- Regulatory agency contacted with preliminary cleanup plans
- Licensed contractor contacted for cleanup services
- Background samples collected and analyzed
- Project management of contractor activity
- Air monitoring during all cleanup activity
- Clearance air monitoring post cleanup
- Submission of project management report to regulatory agency
